

***Specializing In Exotic and
Hard to Machine Materials***

We specialize in working with hard to machine materials including:

6AL-4V Titanium	Hastelloy
Invar	A-286
Inconel	Ultem
Waspaloy	Vespel
Nitronic 50	

***Capabilities for Meeting Precision
Requirements and Tight Tolerances***

We buy only the best manufacturing machinery. In addition, we hire the cream of the crop in machining specialists. Our temperature-controlled metrology lab ensures the highest levels of precision.

***Guaranteeing Fast
Turn-Around Times***

We recognize the importance of meeting requisite delivery times. We guarantee on-time delivery as part of being a trusted, reliable service provider.

***Delivering Inspected Parts
That Are Ready to Use!***

We leverage the latest in manufacturing technology, which assures high precision machining, in a highly replicable process. The resulting parts are guaranteed to be in tolerance and ready to place in service.

***Sangat Precision Machining & Grinding
Has Invested in Security***

Recognizing the unique nature of our clients and their need for security and confidentiality, management has taken significant steps to provide a highly secure infrastructure. From physical security including the latest in security technology, to digital security involving client data and information, we are dedicated to preserving the integrity of your organization.

***Excellence In Time-Sensitive Precision Machining
For Aerospace, Science, Defense and Medicine***

In a competitive world, professionals cannot afford to risk their reputations and careers on inferior service providers. We are dedicated to working with organizations and individuals whose businesses require a significant level of performance and quality from their vendors.

If the success of your company or group relies on precision machined components, our company stands ready to meet and exceed your expectations.

We have a proven track record of working with clients in the world's most demanding industries. We deliver premium quality services to organizations in industries where much is at stake.

When the situation is critical, with demanding requirements, our company is the only reasonable choice.
